## **SAFETY DATA SHEET**

**ARMOR SHEEN** 

### Section 1. Identification

Product identifier	: Armor Sheen
Product code	: Not available.
Other means of identification	: Not available.
Product type	: Liquid.
Relevant identified uses of	the substance or mixture and uses advised against
Product use	: Asphalt shingle coating.
Area of application	: Professional applications.
Supplier/Manufacturer	: Delta Coatings & Sealants Inc. 2000 Argentia Road, Suite# 400, Plaza# 3, Mississauga, ON. L5N1V9.
e-mail address of person responsible for this SDS	: info@deltacoatings.ca
Emergency telephone number (with hours of operation)	: US / Canada 1-647-868-3330

### Section 2. Hazard identification

Classification of the substance or mixture	: SKIN SENSITIZATION - Category 1A
GHS label elements	
Hazard pictograms	
Signal word	: Warning
Hazard statements	: H317 - May cause an allergic skin reaction.
Precautionary statements	
Prevention	<ul> <li>P280 - Wear protective gloves.</li> <li>P261 - Avoid breathing vapor.</li> <li>P272 - Contaminated work clothing should not be allowed out of the workplace.</li> </ul>
Response	<ul> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> </ul>
Storage	: Not applicable.
Disposal	: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

### Section 3. Composition/information on ingredients

#### Substance/mixture

: Mixture

### Other means of identification

: Not available.

Ingredient name	Other names	% (w/w)	Identifiers
2-butoxyethanol propane-1,2-diol bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate methyl 1,2,2,6,6-pentamethyl-4-piperidyl sebacate	- Propylene Glycol - -	≥1 - ≤5 ≥1 - ≤5 ≥0.1 - ≤1 ≥0.1 - ≤1	CAS: 111-76-2 CAS: 57-55-6 CAS: 41556-26-7 CAS: 82919-37-7
octhilinone (ISO)	-	≤0.1	CAS: 26530-20-1

Ranges if listed above for hazardous ingredient(s) are prescribed ranges. The actual concentration(s) or actual concentration range(s) are being withheld as a trade secret.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First-aid measures

#### Description of necessary first aid measures

Eye contact	: mmediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	: Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Potential acute heal	th effects
Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: May cause an allergic skin reaction.

Date of issue/Date of revision	: 17/04/2024	Date of previous issue	: No previous validation	Version	:2	2/12
Shingle Armor Elastomeric Transparent Co	ating					

### Section 4. First-aid measures

Ingestion	: No known significant effects or critical hazards.
Over-exposure signs/symp	<u>itoms</u>
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: irritation redness
Ingestion	: No specific data.
Indication of immediate mee Notes to physician	<ul> <li>dical attention and special treatment needed, if necessary</li> <li>Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	: In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides organic materials (Various)
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency	: No action shall be taken involving any personal risk or without suitable training.
personnel	Evacuate surrounding areas. Keep unnecessary and unprotected personnel from
	entering. Do not touch or walk through spilled material. Avoid breathing vapor or
	mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is
	inadequate. Put on appropriate personal protective equipment.

3/12

### Section 6. Accidental release measures

For emergency responders	ecialized clothing is required to deal with the spillage, take note of a mation in Section 8 on suitable and unsuitable materials. See also mation in "For non-emergency personnel".	
Environmental precautions	d dispersal of spilled material and runoff and contact with soil, wate is and sewers. Inform the relevant authorities if the product has ca conmental pollution (sewers, waterways, soil or air).	
Methods and materials for co	ent and cleaning up	
Small spill	leak if without risk. Move containers from spill area. Dilute with w water-soluble. Alternatively, or if water-insoluble, absorb with an ir grial and place in an appropriate waste disposal container. Dispose sed waste disposal contractor.	ert dry
Large spill	leak if without risk. Move containers from spill area. Approach rel nd. Prevent entry into sewers, water courses, basements or confin h spillages into an effluent treatment plant or proceed as follows. I licensed waste disposal contractor. Contaminated absorbent mat- the same hazard as the spilled product. Contain and collect spilla bustible, absorbent material e.g. sand, earth, vermiculite or diatoma place in container for disposal according to local regulations.	ed areas. Dispose of erial may ge with non-

### Section 7. Handling and storage

Precautions for safe handling	
Protective measures	• Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. Keep from freezing.

### Section 8. Exposure controls/personal protection

Control parameters

**Occupational exposure limits** 

### Section 8. Exposure controls/personal protection

Ingredient name	Exposure limits
₽-butoxyethanol	CA Saskatchewan Provincial (Canada, 7/2013) STEL 15 minutes: 30 ppm. TWA 8 hours: 20 ppm. CA British Columbia Provincial (Canada, 8/2023) TWA 8 hours: 20 ppm. CA Ontario Provincial (Canada, 6/2019) TWA 8 hours: 20 ppm. CA Quebec Provincial (Canada, 7/2023) C3. TWAEV 8 hours: 20 ppm. CA Alberta Provincial (Canada, 3/2023) OEL 8 hours: 97 mg/m <sup>3</sup> . OEL 8 hours: 20 ppm.
propane-1,2-diol	CA Ontario Provincial (Canada, 6/2019) TWA 8 hours: 10 mg/m <sup>3</sup> . Form: Aerosol only TWA 8 hours: 155 mg/m <sup>3</sup> . Form: Vapour fraction TWA 8 hours: 50 ppm. Form: Vapour fraction

#### **Biological exposure indices**

None known.

Appropriate engineering controls	-	Cood general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measu	<u>res</u>	
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection		
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately

### Section 8. Exposure controls/personal protection

	estimated.
Body protection	<ul> <li>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

### Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Physical state	:	Liquid.							
Color	:	Whitish							
Odor	:	Ammonia. [Slight]							
Odor threshold	:	Not available.							
рН	:	8.5 to 9.5							
Melting point/freezing point	:	-3.5°C (25.7°F)							
Boiling point or initial boiling point and boiling range	:	100°C (212°F)							
Flash point	:	Not available.

# Section 9. Physical and chemical properties and safety characteristics

Particle characteristics	
Median particle size	: Not applicable.
Other information	
Physical/chemical properties comments	: No additional information.

Section 10. Stabil	Section 10. Stability and reactivity				
Reactivity	: No specific test data related to reactivity available for this product or its ingredients.				
Chemical stability	: The product is stable.				
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerization will not occur.				
Conditions to avoid	: Keep away from heat, flame, sparks and other ignition sources.				
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials and reducing materials.				
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.				

#### Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
2-butoxyethanol	LD50 Dermal	Rabbit	220 mg/kg	-
-	LD50 Oral	Rat	250 mg/kg	-
propane-1,2-diol	LD50 Dermal	Rabbit	20800 mg/kg	-
	LD50 Oral	Rat	20 g/kg	-
octhilinone (ISO)	LD50 Dermal	Rabbit	690 mg/kg	-
	LD50 Oral	Rat	550 mg/kg	-

Conclusion/Summary

: Inhalation of high concentrations of zinc oxide may cause metal fume fever ( a flulike syndrome) with symptoms of headache, fever, chills, nausea and vomiting. No exposure to zinc oxide would be expected to occur in the normal use of this product.

#### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
2-butoxyethanol	Eyes - Moderate irritant	Rabbit	-	24 hours 100	-
				mg	
	Eyes - Severe irritant	Rabbit	-	100 mg	-
	Skin - Mild irritant	Rabbit	-	500 mg	-
propane-1,2-diol	Eyes - Mild irritant	Rabbit	-	100 mg	-
	Eyes - Mild irritant	Rabbit	-	24 hours 500	-
				mg	
octhilinone (ISO)	Eyes - Severe irritant	Rabbit	-	100 mg	-

### Section 13. Disposal considerations

 Disposal methods
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
